Cajeput *(Melaleuca cajupute)*

A form of Melaleuca (Tea Tree). It has been said to have amazing tissue-regenerating properties. May help with acne, arthritis, asthma, bronchitis, bursitis, catarrh, colds, coughs, cystitis, dysentery, enteritis, flu, hay fever, headaches, infections of the urethra, insect bites, intestinal problems, stiff joints and muscles, pneumonia, psoriasis, respiratory infections, sinusitis, skin (oily and spots), sore throat, toothache, urinary complaints, viral infections.

Ingredient In: LeMela Plus

Therapeutic Properties: Mild analgesic, anti-inflammatory, antispasmodic, expectorant

Application: Appropriate areas on feet, directly on areas of concern

Contra-indications: If not absolutely pure, can cause further blistering and skin eruptions. NEVER, NEVER take internally: it can cause vomiting and internal bleeding; this is an excellent oil, but use with caution
