LeEndo Relief

LeEndoRelief aids our emotional health because it strengthens and balances the wide range of organs and glands that make up the endocrine system. As our bodies and minds begin to function better, we feel more secure in ourselves. We are able to establish (or reestablish) boundaries between ourselves and others. This does not mean that we become prickly or rude; it enables us to be tactful and firm while still being kind and concerned. Effective for hot flashes.
