### ! CAUTIONS:

LeSynopsis contains a small amount of some essential oils which are, when used by themselves as single oils, contra-indicated for use during pregnancy. ### EMOTIONAL-SPIRITUAL-MENTAL ASPECTS:

LeSynopsis opens the mind to consideration of the emotional drivers behind digestive issues. Digestive problems that include a great deal of bloating and cramping or alternating bouts of diarrhea and constipation often have emotional roots.

Some possible emotional drivers might include holding on to the past, feeling a deep need to be in control, or maintain control, in all situations at whatever the cost, a need for greater trust and cooperation in relationships, and a need to unravel or untwist complicated situations or relationships. Feelings of fear or rejection may also be a part of digestive disturbance patterns.

### PHYSICAL ASPECTS:

LeSynopsis contains many of the best digestive oils in the essential oil repertory combined with essential oils that are specific to the emotional drivers of digestive and colon issues. This blend, however, is formulated in such a way as to particularly target liver and gallbladder cleansing and support.

LeSynopsis also has a special affinity for both the small and large intestines. This is a great blend for indigestion, bloating of the stomach or intestinal area, constipation, and diarrhea.

### GENERAL INFORMATION:

This is an example of blended oils being safer to use than single essential oils. Nevertheless, there is always cause for moderation and caution whenever oils such as Peppermint, Tarragon, Fennel, and Turmeric are used during pregnancy, even as only a small percentage of a blended oil.
