QUICK REFERENCE SHEET

CARROT SEED CO2

Daucus carota

Plant Family: Umbelliferae

Extraction Method: CO2

Part Utilized: Seeds

Region of Origin:

Germany

AFFINITY FOR:

skin, cardiovascular system, liver, digestive system, gallbladder meridian, intestinal tract, nervous system, liver meridian

THERAPEUTIC PROPERTIES:

hepatic, nervous system and cardiovascular tonic, diuretic, vermifuge

AROMATIC CONSIDERATIONS:

When diffused, Carrot Seed can strengthen our sense of inner fortitude and will power.

APPLICATION:

Carrot Seed should be used, diluted, directly on the areas of concern.

INGREDIENT IN:

LeRevitalize, LeSynopsis, LeVallee

EMOTIONAL-SPIRITUAL-MENTAL ASPECTS:

Carrot Seed oil helps fortify those who are feeling weak, inefficient, or disorganized. This oil is well suited to impractical dreamers. Carrot Seed can give focus and energy to those who procrastinate projects because we don't want to put forth the necessary hard work or mental effort.

PHYSICAL ASPECTS:

Carrot Seed is a powerful liver detoxifier and blood cleanser. It is particularly useful in bowel inflammations. Carrot Seed is of benefit for digestive problems such as constipation, diarrhea, and gas.
Carrot Seed contains carotene and vitamin A. These nutrients strengthen eyesight and help with anemia. They also make Carrot Seed a very good oil for skin health and healing. Carrot Seed should be considered for burns, psoriasis and eczema, open sores, ulcers, and boils. Carrot Seed applied to the hands regularly may lighten or prevent age spots.

GENERAL INFORMATION:

CO2 extraction pulls more of the delicate constituents out of the plant material that can be damaged by the heat of steam distillation. This results in a more potent oil, both in aroma and in therapeutic value. CO2-extracted oils tend to be more expensive than steam-distilled oils, but the higher quality is often worth the price. Carrot Seed is steam distilled and Carrot Seed CO2 is extracted by the CO2 method.
