

QUICK REFERENCE SHEET

PEPPERMINT CORN MINT

Mentha arvensis

Plant Family:
Labiatae

Extraction Method:
Steam Distilled

Part Utilized:
Stems, Leaves, Buds

Region of Origin:
India

AFFINITY FOR:

digestive system, tissues, nerves, mind, earth element, wood element, yang energy, throat chakra, lung meridian, small intestine meridian

THERAPEUTIC PROPERTIES:

tonic, cytophylactic, anti-infective, antiseptic, decongestant, antibiotic, antifungal, antidepressant, anti-toxic, aphrodisiac, astringent, calmative, nervine, anti-inflammatory to the nerves and the prostate

AROMATIC CONSIDERATIONS:

Peppermint Arvensis is similar to Peppermint Piperita, but is more reminiscent of candy canes.

APPLICATION:

Peppermint oil should be diluted well before applying to the skin. Peppermint is a good massage oil for stimulating circulation. Peppermint is too strong to be added to a bath. Add to a diffuser for help with concentration.

! CAUTIONS:

Arvensis has a higher menthol content than Piperita, making it slightly more potent therapeutically, and a little more caustic. Peppermint oil is stimulating to the uterus. Extreme caution should be taken with using Peppermint oils—particularly the amount used—if pregnant.

INGREDIENT IN:

LeCrystal Clear, LeFortitude, LeLiteN, LePaine, LeTendaCare

EMOTIONAL-SPIRITUAL-MENTAL ASPECTS:

Peppermint is like a rush of fresh energy into the system. It allows us to relax instead of letting anxiety build up in our body or mind. Peppermint oil is specific for people who move between highs and lows, sadness and happiness, until the ever-widening mood swings settle into lethargy, intolerance, and frustration. Just as Peppermint strengthens the digestion and aids the absorption of nutrients on a physical level, it enhances our ability to “digest” new ideas and impressions.

PHYSICAL ASPECTS:

Dr. Dembar of the University of Cincinnati discovered in a research study that inhaling Peppermint oil increased the mental accuracy of the students tested by up to 28%. Peppermint oil can also be used for headaches and nerve regeneration.

Peppermint is renowned for action on the digestive system and for use in bowel disorders. It is one of the best essential oils for nausea, vomiting, morning sickness (small amounts only), mouth or gum infections, fainting, and motion sickness.

Peppermint oil is strongly anti-inflammatory and analgesic. Peppermint oil increases circulation. All varieties of Peppermint essential oil are useful for muscle pain, inflamed joints, and arthritis. The anti-inflammatory properties make Peppermint essential oil supportive of prostate function.

GENERAL INFORMATION:

Peppermint, like Lavender, is soothing in small amounts and strongly stimulating in larger amounts.
