Chaulmoogra

Chaulmoogra is used in the treatment of skin disorders such as eczema. It is also used for bruises, sprains, sores, and wounds. In England, it is recommended in treatments for tuberculosis. Chaulmoogra is sometimes used in the cosmetics industry to even the pigmentation of the skin. The fresh, ripe seeds of this plant are reputed to contain an essential oil that has been used specifically in the treatment of the early stages of leprosy. This has been documented in several countries over a period of several hundred years.
