Davana

Davana is popular in the perfume industry where it has the reputation of making a scent unique to the individual wearing it. This property is obvious in the pure essential oil as well. The aroma of Davana is difficult to describe because it usually smells quite different from person to person. The aroma of Davana is very different on the skin than whiffed from a container or when it is diffused. Davana eases anxious feelings and nervousness. It is helpful in recovering from shock, trauma, disappointment, and perceived failure. Davana is considered a potent aphrodisiac.
