Ledum

Ledum acts as an enzyme to remedy liver dysfunction and aid in liver detoxification. A stronger liver creates a balanced thyroid, a stronger immune system, better functioning kidneys, and clearer skin. Used in programs for weight management, obesity, edema, and water retention. A review of recent literature indicates that Ledum maybe even more anticarcinogenic and anti-tumoral than frankincense. Should not be used if you are pregnant. Its use should be avoided with very young children.
