Rose Geranium

Rose geranium is for those who feel burdened by, or resentful of, the necessity to work so very hard. This situation may be a perception or reality. Rose geranium can benefit those who have found themselves in a real position of never-ending work, with no rest, no pause, and maybe even with very little reward. Rose geranium stimulates the lymphatic system, relieving congestion and pain throughout the body. As the body detoxifies, symptoms of PMS such as water retention, bloating, and headache disappear.
