

Ready For Summer Kit

Summertime, where will your adventures take you? Hiking, swimming, reunions, camping, the zoo? This kit is designed to keep the sun and the bugs at bay, so you can enjoy your summer fun and your family.

LeBeGone Soap

Each of the single oils in LeBeGone are among the best at repelling insects. LeBeGone was designed to help prevent insect and tick bites. LeBeGone has an amazing aroma and is one of my favorite oils to wear, even when not out in the "wild". LeBeGone contains many oils used for depression, anger, and judgemental attitudes and creates a feeling of being loved and supported. Keep bugs at bay everytime you wash your hands.

LeMelaPlus

LeMelaPlus can be applied topically on insect bites and stings. Adding LeMelaPlus to Miracle Salve, sold at Butterfly Express, makes a great antibacterial ointment for cuts and abrasions. LeMelaPlus is strongly antiseptic. It prevents the growth of bacteria, fungus, and other infectious agents. LeMelaPlus can be used for athlete's foot and toe nail fungal infections. LeMelaPlus is also used for disinfecting cuts, scrapes, and wounds.

Lavender

Lavender is a universal oil that has been shown to balance the body and to work wherever there is a need. It is called 'the grandmother' of essential oils because it cares for and nurtures us through such a variety of physical and emotional stresses. If you don't know what essential oil to reach for, try lavender. Lavender can help us move from judgement to kindness and generosity. Lavender can be applied to cuts, sunburns, burns, rashes, dermatitis, eczema, and insect bites.

Miracle Salve

This salve is incredibly healing. Herbal salves are wonderful things! They are convenient to use and very powerful. Miracle Salve is useful for burns (everything from sunburns to very serious burns), cuts/wounds (it will help it heal as well as preventing/fighting infection and minimizing scar tissue), rashes, dry or cracked skin, and just about anything else you can think of. You can use it by itself, or use it as a carrier oil to apply your essential oils.

SunShade Lotion

Sun Shade Lotion is designed to provide light sun cover without chemicals. It contains all natural oils that inherently have an SPF factor ranging from 28-50. Natural oils like cocoa and mango butter are mixed with water and emulsifiers to make a very luxurious lotion. With any product used for sun protection it is a good idea to reapply every 60 to 90 minutes. For extra protection you can apply more than one layer.
